

Trusted, Citizen – LEA collaboration over sOcial Networks

Simon Ivansek

• XLAB

The project in nutshell

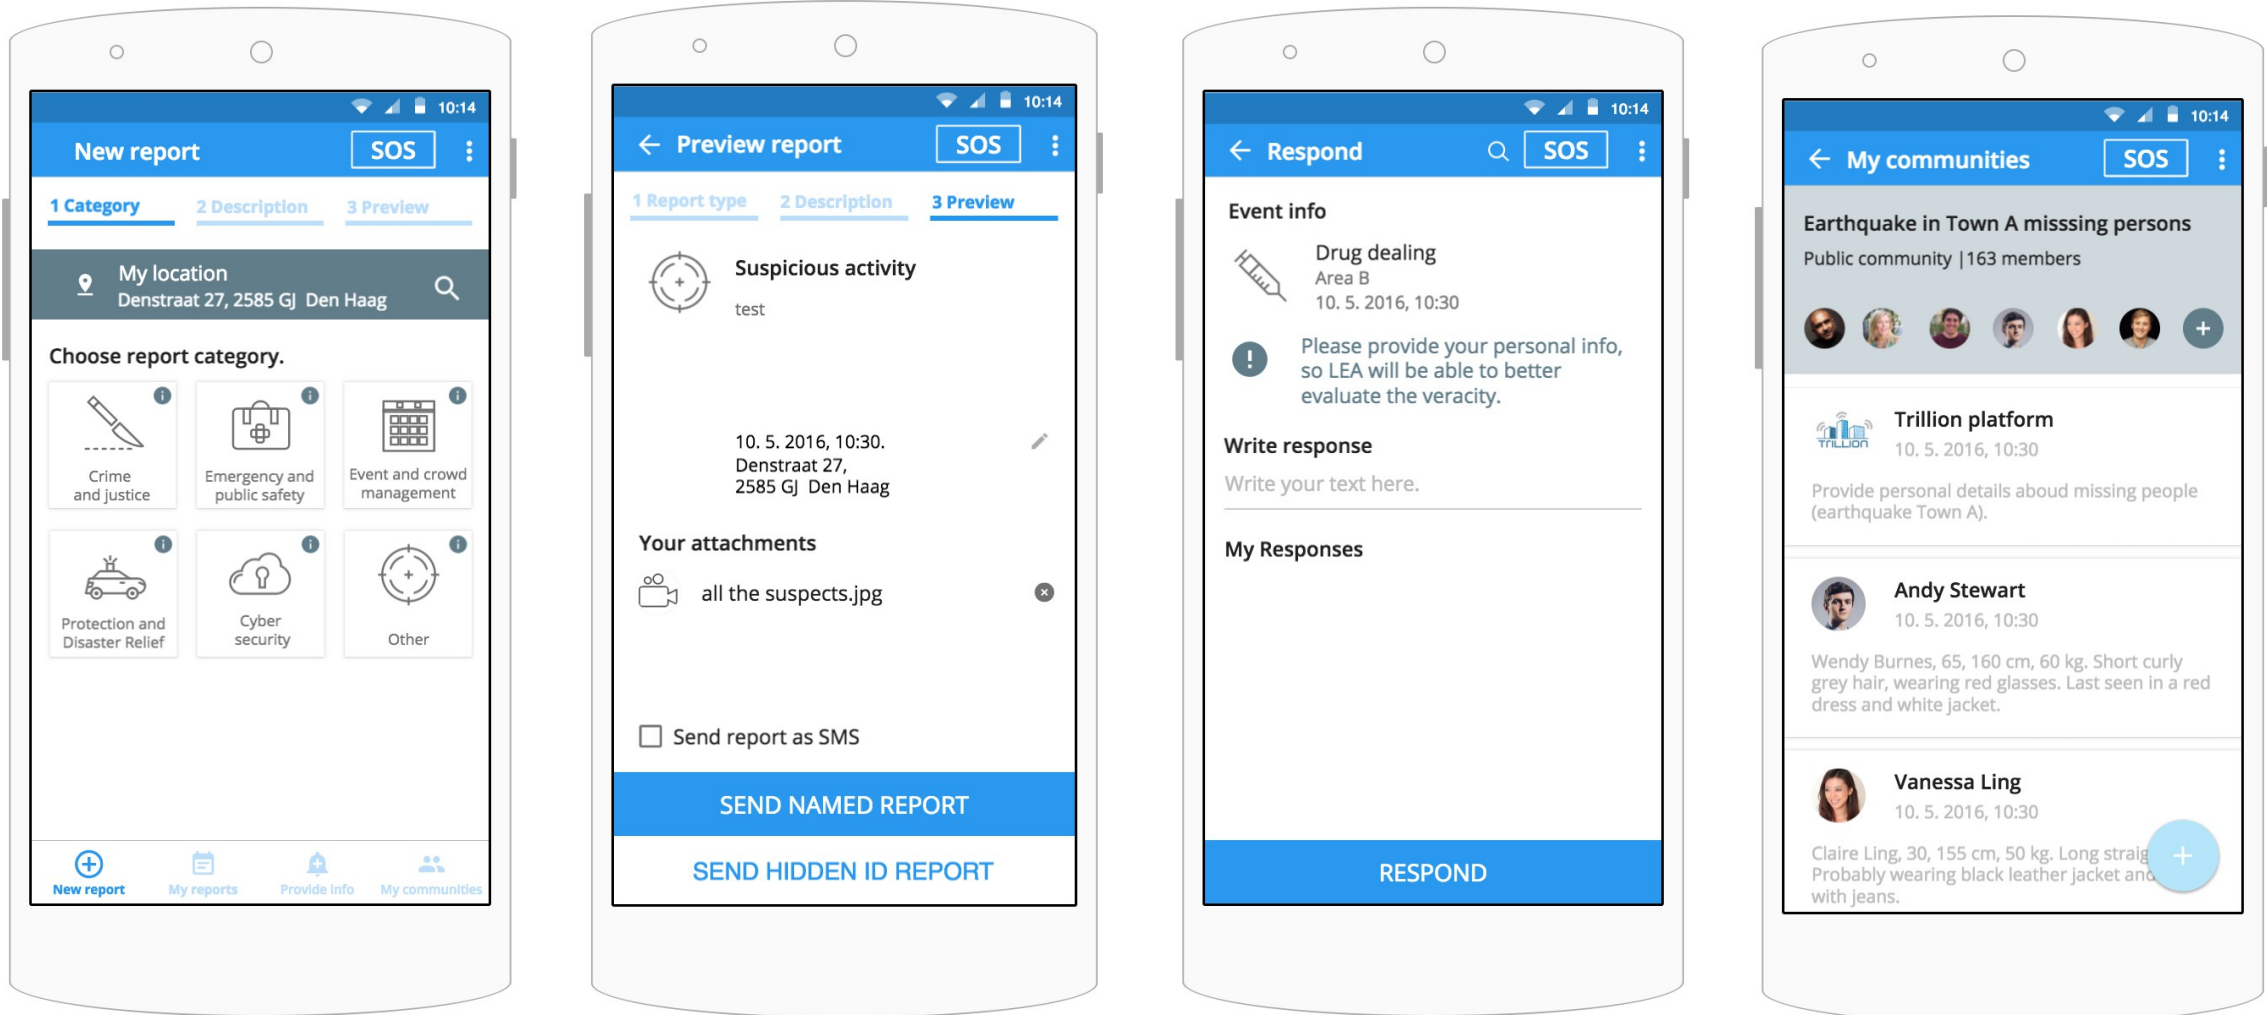

12 partners from
8 countries
delivering **1** integrated platform
tested across **5** locations
involving **10** users
over **36** months

What is TRILLION?

- The TRILLION project proposes an open and secure socio-technical platform to foster effective communication and collaboration inside citizen communities and between citizens and law enforcement agencies in order to implement virtual mechanisms for better *Community Policing*
- TRILLION delivers **web and mobile applications** to support the extensive **collaboration between citizens and LEAs** for incident discovery, prediction, reporting and interaction taking into account stakeholders needs and ensuring privacy and data protection.

Challenges

- Establishing trust between LEAs and citizens
- Privacy, legal and ethical issues arising with usage of TRILLION
- Anonymity and trust (e.g.: crimestoppers UK)

TRILLION for policy-making

- Use TRILLION approach for policy-making
- Socio-technical platform for collaboration between organizations/governments and citizens
- Establishing trust between organizations/governments and citizens
- New channel for communication between organizations/governments and citizens

Thanks for your attention!
